

# Pot Perm® Plus

## Greensand Iron Filter Regenerant

### Maintains performance of greensand iron filters.

Pro Pot Perm Plus is a strong oxidizing agent that converts dissolved iron and/or manganese to insoluble oxides which can easily be removed through filtration. Pot Perm Plus regenerates and oxidizes greensand iron filter media, restoring the exchange capacity of the unit. Available in 2 lb, 5 lb and 10 lb sizes.

### Applications

For each cubic foot of filter media, 2-4 ounces of dry Pot Perm Plus is suggested. It may be added directly to the filter or mixed with water and added as a solution. Eight ounces of Pot Perm Plus will dissolve in one gallon of water at room temperature (68°F). Consult the iron filter manufacturer for regeneration information.

### Benefits to the User

- NEW formula is more soluble and more effective in converting dissolved iron and/or manganese to insoluble oxides which can easily be removed through filtration.
- Composed of National Sanitation Foundation (NSF) certified material to meet Standard 60: Drinking Water Treatment Chemicals.
- Maintains maximum performance of greensand iron filter.

### Technical Information

- The solubility of Pot Perm Plus is temperature dependent and adjustments should be made for varying ambient temperature ranges.
- Store in a cool, dry, area in closed containers. Segregate from acids, peroxides, and all combustible, organic, or easily oxidizable materials. Read relevant MSDS before handling this product.
- Stains can be removed from the skin with a simple mixture of 30 parts 3% USP hydrogen peroxide and 40 parts 5% good-grade white vinegar with 30 parts of water.
