

A compact all-in-one boosting pump. Incorporates an integrated speed controller to maintain a constant pressure in the pipe system. Its pressure sensor monitors change in water pressure/consumption, signaling the speed controller to change motor speed and adapt performance to the new situation. Well suited for a wide range of residential and commercial applications.

STANDARD FEATURES

Adjustable Constant Pressure: Utilizes an intelligent pump controller to automatically adjust the motor performance.

All-In-One Pump: Separate pressure tank, pressure switch, and low feed water protection switch are not required.

Fast Installation: Can be installed in a matter of minutes.

Simple Operation: User-friendly interface to adjust pressure settings and ON/OFF functions.

Built-In Protective Functions: Protects against dry running, excessive temperature, or any overload condition.

Automatic Restart: Attempts to restart pump in case of dry running or similar alarm.

Self Priming: A lift capacity of 23 ft.

Low Noise Level: Very quiet operation that is less than 55 dBA and even lower at controller speeds.
